

18:31:19 From Guisinger : we are unable to hear anyone  
18:32:13 From Rob Burton : try turning up the volume  
18:37:20 From Steve Desvernine : sdesvernine@cra.email  
18:45:54 From Sharon Burton : Can everyone please go on mute. There is some background noise. Thanks!  
18:47:05 From Sharon Burton to Steve Desvernine(Privately) : can you please ask everyone to go mute. There is some background noise. Thanks  
19:07:56 From Rob Burton to Steve Desvernine(Privately) : You should rename your name so others know it's you and not Steve D  
19:20:04 From Rob Burton : 561-762-2660 can you please go on mute  
19:23:54 From Joe : They are on a phone. I suspect that they cannot see your message  
19:27:03 From Rob Burton : disgusting!  
19:32:19 From Joe to Steve Desvernine(Privately) : There are at least 5 people on the call identified only by a phone number. Can we be sure that they are homeowners?  
19:50:40 From Bill Seufert : The 36% figure is not accurate.  
19:51:05 From Bill Seufert : Not every resident returned a survey.  
19:52:00 From Dawn Jacobs : 54% did NOT want hotwire  
19:52:30 From Milt Jacobs : based on false and misleading information  
19:52:36 From Joe : But what were the self interests of the Board?  
19:52:58 From Randy Scheid : I haven't even seen the petition. Can someone forward to me?  
19:53:23 From Bill Seufert : Exactly! Everyone was retired by government order to remain at home  
19:53:35 From Bill Seufert : "Required"  
19:53:40 From Rob Burton : We never saw the petition  
19:59:00 From Michael Colonna : so they object to the survey because all owners didn't respond, but they are ok with not giving everyone a copy of the petition?  
  
20:00:39 From Rob Burton : Can someone clarify, did 71 people or 71 households sign the petition?  
20:00:57 From Sylvia : Households  
20:01:21 From Rob Burton : thx Sylvia  
20:01:46 From Milt Jacobs : That is being alleged But in doing so the provided false information and misleading information to obtain the results they desired.  
20:03:51 From emilypantelides : What could have been done differently is 1. Take a vote not a survey 2. ALLOW public comment at the last board meeting. Not take a public vote without comments  
20:07:28 From Linda Kelly : Also the channels for 'free' is an issue. Many are not included without a premium. E.g., one of my favorites Hallmark Movies & Mysteries and the Science channel will cost us \$30/month. 10 Yrs - \$3600 more than current.  
20:08:36 From Linda Kelly : Would like to see the channel lineup and the contract length negotiated please.  
20:08:56 From Sylvia : we should have kept it with just cable, let everyone choose their own internet  
20:13:56 From Bill Seufert : Not many residents opted to debunk.

20:14:03 From Randy Scheid : Who is speaking?

20:19:38 From Rob Burton : Was Comcast asked if they would extend our contract for 1 more year or was it 5 yrs only?

20:19:51 From Milt Jacobs : no

20:22:40 From Joe : Comcast has already extended for 1 year.

20:23:40 From Joe : Debulk, you have 2 choices - Comcast or ATT. No price protection

20:25:11 From Rob Burton : If we are at a standstill, maybe a compromise path forward would be to see if Comcast would extend for 1 more year

20:34:21 From Joe : While talking about Term. we have already had Comcast for over 10 years, another 5 its 15 +. And yet we should be concerned about a competitor's 10 years.

20:35:34 From Thomas Roth : Lack of competition.

20:36:47 From Dawn Jacobs : Still not letting multiple contractors in my home...right now ...and think we need to see where this goes...FL is the top of the list of states going up ...and it's not stopping anytime soon (within 6 months)

20:37:44 From Randy Scheid : Thank you to the board for your efforts. Appreciate the thought on this decision.

20:45:16 From Alix Troast : I also have concern about the possible disruption of service with the installation. Our children will most likely be on a hybrid schedule of in-person and distance learning. I understand that Comcast will still be our provider during this time, but what if something happens by accident, like a cable being cut. We can't be without service at all during school.

20:46:45 From Joe : My understanding is that Comcast is not disconnected until Hotwire is connected and working

20:48:30 From Milt Jacobs : that is correct

20:48:37 From Alix Troast : I understand that Comcast will not be disconnected. My concern is what if Comcast connections are disrupted by accident. They will be digging up property and there is a strong likelihood that something could impact connectivity.

20:49:20 From Bill Seufert : Form a project committee with homeowner's and BOD members

20:49:36 From Alix Troast : There are so many children attending different schools in this community. We need to be very mindful of their needs.

20:53:13 From Milt Jacobs : Hotwire has a website with all info you need. They have been around for 30yrs. Even if the folded how hard would it be to re-engage comcast since there infrastructure is already installed.

20:53:43 From Joe : I say let the Board do its job and let the chips fall, as distasteful as do overs are.

20:54:57 From Linda Kelly : Milt I understood that all of Comcasts wiring must be removed for Hotwire to take over.

20:56:17 From Milt Jacobs : no it will still be there. Only old cable will be upgraded at Hotwires cost. So Comcast will benefit from the upgrade to the wiring.

20:58:21 From Linda Kelly : OK that's a point I misunderstood.

20:58:33 From Rob Burton : Linda, not the case. They will either run new Cat5/6 ethernet wiring in the house or if home has newer coax they might use existing coax if homeowner requests.

20:59:51 From Linda Kelly : OK Thanks Rob

21:00:47 From Milt Jacobs : They will not remove any of comcast wiring is

my understanding. the new wire will be next to or in the same proximity

21:01:33 From Linda Kelly : Thanks Milt.

21:03:04 From Milt Jacobs : Rob is that constant with what you know?

21:03:44 From Mark McCormick : Wherevis the building that they will need to build for their equipment... where will they put this?

21:04:22 From Rob Burton : Correct Milt

21:05:47 From Joe : I have sat through 3 hour delays with Comcast when ethe technician was sitting across the street

21:07:23 From Milt Jacobs : the building has not been decided. But they will put it wherever we decide. Anywhere on the North fork property. We have several areas that is concealed from view that we will consider

21:08:54 From Alix Troast : What will happen with 911 calls with Hotwire?

21:09:32 From Joe : Subcommittee to rehash everything that has been known for 6 mos. is not necessary in my opinion. And trying to back the Board into a corner to accept their findings is wrong.

21:10:59 From Joe : I think FCC rule require any carrier to provide 911 sevice

21:11:01 From Milt Jacobs : You will have home service just like you have now. cell phone service will be routed via internet. There is a choice for internet calling on your cell phone. I have to use internet calling now in my house

21:12:47 From Milt Jacobs : Linda also remember last month we lost cable/internet service with Comcast 3 times for about a half a day each.

21:12:57 From Mark McCormick : iI think that also is a concern ...what if it is someplace that will be an eye sore or close to our property .. Comcast does not need a building

21:13:52 From Alix Troast : Will we need landlines again for 911 calls if we move to fiber optics. Of the 132 homes, how many rely on cable for phone? Cell phone service can be very unreliable. During hurricanes, I have had to rely on my cable line. No cell service

21:13:52 From Joe : Steve and Board. Good job and thanks.

21:14:15 From Rob Burton : Totally worthwhile. Thank you Steve and the rest of the board AND the homeowners who took the time to be on this call tonight!

21:14:20 From Milt Jacobs : Was the petition drivers were concerned about COVID when they went door to door. Just a thought

21:19:57 From Thomas Roth : what

21:20:03 From Thomas Roth : is the email address

21:20:54 From Milt Jacobs : sdesvernine@cra.email

21:21:01 From Thomas Roth : thanks

21:25:09 From Alix Troast : Thank you

21:25:38 From Guisinger : I agree, thank you!
