

# North Fork Homeowner Non-Binding Survey (Please Respond by 5/14/20)

Homeowner's Name(s): \_\_\_\_\_

Property Address: \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## ➤ Question # 1: Cable TV & Internet Bulk Services

A. Please indicate your preference (1, 2, 3) for the three options below in the order that you would like to see them in North Fork as a community (please place either a 1, 2, or 3 in each box to indicate your desired order of preference; i.e., 1 = 1<sup>st</sup> choice, 2 = 2<sup>nd</sup> choice, 3 = 3<sup>rd</sup> choice):

- Comcast
- Hotwire
- De-Bulk (Homeowners would then each enter into their own individual agreement with Comcast, or AT&T, and the POA would no longer be involved in the process.)

## ➤ Question # 2: Community Street Lighting Project

The North Fork Infrastructure Committee is in the process of evaluating replacing all of the current street lights within the community, which are original (approx. 30 years old) and showing signs of significant wear-and tear. Funds have been allocated in the POA's capital plan, based on the 2018 Reserve Study, to pay for this capital improvement (with no new additional assessments required). The committee has received a few unsolicited inquiries from homeowners about the possibility of increasing the uniformity of lighting within the community to help address poorly lit areas, as there are presently a limited number of street lights inside the gates and they are spaced relatively far apart.

A. Which one would you prefer (please select one box only):

- Replace only the existing street lights inside and outside the gates (i.e., no increase in the number of street lights).
- Add new street lights to increase the uniformity of lighting along the streets and in the cul-de-sacs inside the gates within the community.

B. In addition to street lights within the community, which one would you prefer (one box only):

- Add new street lighting along North Fork Drive.
- Add new landscape lighting along North Fork Drive (i.e., along the sidewalk).
- Add both street lighting and landscape lighting along North Fork Drive.
- No new lighting along North Fork Drive (i.e., keep as-is).

C. From a design/aesthetic standpoint, which street light style would you most prefer directionally as a replacement (please select one box only):

- Something similar to the existing style (i.e., traditional/Victorian).
- Something different from the existing style (i.e., more contemporary/modern/simple).
