|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
| Assumptions: |  |  |  |  |  |  |  |  |  |  |  |  |
| (1) Would require further evaluation in 2029 and beyond to determine if any reconstruction work is necessary and, if so, could require an additional unbudgeted assessment, if needed. |  |  |  |  |  |  |  |  |  |  |  |  |
| (2) Need to evaluate cost further based on McKenzie Reserve Study. Accoring to MacKenzie 2019 study, tennis court fence has a 10 year remaining life and basketball court fence has 20 years. |  |  |  |  |  |  |  |  |  |  |  |  |
| (3) Refurbishment includes new platforms \& supports, new soft landing, and permanent elimination of slide. Assumes platform/supports lifespan of 10 years \& replacement (\$9K) in 2028. |  |  |  |  |  |  |  |  |  |  |  |  |
| Assumes 2.5\% average annual inflation rate per year |  |  |  |  | 1 |  |  |  |  |  |  |  |
